PROFESSIONAL SUMMARY

Computer Science graduate with hands-on experience in machine learning and data analysis. Skilled at cleaning complex datasets, building and tuning predictive models, and translating raw data into clear, meaningful insights.

EDUCATION

B.Tech in Computer Science & Engineering | Bahra University, Solan

CGPA: 7.4 / 10.0

EXPERIENCE

AI/ML TRAINEE

- Built and trained deep learning models using **CNNs** and **RNNs** for real-world classification tasks.
 - Worked with **Large Language Models (LLMs)** and generative AI tools, applying modern **NLP** techniques.
 - Applied **supervised ML (XGBoost, Random Forest, LSTM)** with **feature selection, cross-validation, and hyperparameter tuning** to predict fuel efficiency and failure rates across 500+ BMW models — achieving **92% ROC-AUC**.
-

PROJECTS

AI Mock Interviews

- Built a real-time Facial Emotion Recognition system using **OpenCV** and **DeepFace**, detecting 7 emotions via webcam.
- Developed a Speech Emotion Recognition pipeline with **Librosa**, **SVM**, and **Scikit-learn** using **MFCC** features on RAVDESS/SAVEE datasets.
- Built end-to-end ML pipeline using **Python (Pandas, NumPy, Scikit-learn)** and **TensorFlow/Keras** to forecast fuel efficiency
- Experienced in building **CNNs**, **RNNs**, and stacked **LSTMs** for image, audio, and text classification.

Analytics for BMW Vehicle Performance Optimization

- Developed predictive ML models on 500+ BMW vehicle datasets to forecast fuel efficiency, engine wear, and failure rates, reducing predicted maintenance costs by 15% and achieving 92% accuracy in early failure detection
- Performed full ML pipeline: data acquisition, **EDA**, preprocessing, model development, and visualization.
- Delivered an interactive **Jupyter Notebook** dashboard for stakeholders highlighting degradation factors and maintenance strategies.

Amazon Clone

- Built a static e-commerce prototype mimicking Amazon's layout using pure **HTML & CSS** with **Flexbox** and mobile-friendly media queries.
- Included search bar, product grid, hero banner, account links, and a complete footer with social media and copyright info.

E-Commerce Web Application

- Developed a responsive web app using **Bootstrap**, **JavaScript** with loading animations, collapsible navigation, and consistent UI styling.
- Integrated social media links, team sections, and a company footer with contact details.

SKILLS

Technical: Python, AI/ML, Java, SQL, React, HTML/CSS, JavaScript, TensorFlow/ Keras, OpenCV, Scikit-learn, Power BI, Excel, AWS

Soft Skills: Teamwork, Communication, Problem-Solving, Analytical Thinking

Certifications: Java Core, Front End Developer, Data Science Methodology, AI/ML certification
